It is important to understand that the furnishing a certificate of insurance may not fulfill all your obligations under the rental agreement. The limit of insurance coverage for equipment is issued on a per occurrence basis not a separate limit for all rental companies involved in a production. Therefore, it is essential that the limit for equipment coverage equals the total value of all equipment used on a job. If your limit of insurance is inadequate to cover the loss, or your insurance does not cover the type of loss that occurred, you will be responsible for the difference between the amount of insurance and the actual loss. It is in both your own interest, as well as our interest, that adequate insurance limits are maintained.
